

CARNEGIE INSTITUTION OF WASHINGTON  
DEPARTMENT OF GENETICS  
COLD SPRING HARBOR, LONG ISLAND, N. Y.

October 15 1951

Dear Josh,

thank you for your letter. Everything you sent me will be very useful. I hope in a very short time to send you the manuscript, I would appreciate very much to receive it back with many corrections and new suggestions. The experiment of keeping the audience awake will be performed next week on the C.S.H. staff. More space will be given to phage, probably because I know more about it, but also because the story is more involved. I am writing to Professor Tatum as you suggest.

Thank you again and so long.

Sincerely

*Niccolo*
